SUMMARY

Software Developer experienced in building full-stack applications using **Python**, **React**, **TypeScript**, and **Node.js**. Worked on **REST APIs**, **MCP** servers for AI-agent workflows, and **GitHub Actions** automation. Hands-on experience with MongoDB, PostgreSQL, MySQL, and GitHub CI/CD workflows.

TECHNICAL SKILLS

Frontend Technologies: React, Next.js, TypeScript, Redux, Tailwind CSS, JavaScript, HTML, CSS
Backend & Databases: Node.js, Express.js, Python, Flask, FastAPI, MongoDB, MySQL, PostgreSQL
AI & Automation: MCP, Claude Agent SDK, Prompt Engineering, Workflows & Agents
Tools & Deployment: Git, GitHub Actions, CI/CD Pipelines, AWS S3, Docker, Nginx, REST APIs, WebSocket

WORK EXPERIENCE

Software Developer
Ramco Systems (GITS), Chennai, TN *Feb 2026 – Aug 2026*

- Built and deployed a configuration management service with FastAPI, React (TypeScript), and **Nginx**, centralizing configuration across 5+ services and environments and eliminating manual `.env` updates.
- Engineered an HTTP-based MCP server exposing custom tools and prompts to **Claude** and GitHub Copilot, accelerating error diagnosis by pulling logs and artifacts on demand from **MongoDB** and **AWS S3**.
- Automated rule creation and modification through Claude workflows, agents, and hooks – eliminating 3 manual generation steps per rule by concurrently producing English, Pseudo, and Python representations from Excel definitions, with a Rule Validator agent triggered via hooks for syntax and logic checks.
- Implemented 3 **GitHub Actions** workflows to publish rule packages to S3, sync rule data with the vector database, and build versioned, dependency-inclusive Python packages for deployment to the file server.

Full Stack Developer
Xagrotor Tek Pvt Ltd, Chennai, TN *June 2024 – Dec 2025*

- Launched the company's business website using React for the frontend and Node.js with **MySQL** for backend services with SSL security and SEO optimization, improving product page visibility by 40%.
- Enhanced the organization's e-commerce platform by contributing to **MERN**-based modules and **Tailwind CSS** layouts, resulting in a 25% improvement in user navigation efficiency.
- Deployed a locally hosted inventory management system to streamline stock monitoring, cutting manual record maintenance by 75%.

WebGIS Developer Intern
Nevar Systems, Puducherry, PY *Feb 2024 – Apr 2024*

- Designed **Flask**-driven WebGIS solutions featuring layer control, spatial measurement, and analytical tools, handling 1,000+ spatial queries per month.
- Established OTP-based authentication mechanisms to strengthen application security and cut unauthorized access attempts by 50%.
- Connected geospatial datasets including Shapefiles, DSM, and Ortho-imagery from **GeoServer** into **PostgreSQL**, accelerating data access by 35%.

Full Stack Developer Intern
Nevar Systems, Puducherry, PY *June 2023 – Sept 2023*

- Formulated a fault detection pipeline using Flask integrated with **YOLOv8** models, achieving 95% accuracy on drone imagery.
- Constructed a user-friendly interface for drone image annotation and bounding box editing, decreasing manual inspection effort by 50%.
- Refined MySQL query structures and database schema, delivering a 23% improvement in query performance and overall responsiveness.

Freelance Developer
Independent Contractor *2024 – 2025*

- **DecoHeavens (2025):** Full-stack interior decor business website with 50+ media assets and modular content sections, integrated **Cloudinary** image optimization and **Nodemailer**-based enquiry handling, reducing manual follow-ups by 50%.
- **D2D Spot (2025):** Business website with blog management and admin dashboard spanning 10+ content modules, delivered a Novel-style editor and **dnd-kit** Kanban board, lowering content update turnaround by 40%.
- **Dragon Tech Solutions (2024):** Responsive full-stack business website with 6+ core pages and Nodemailer-driven enquiry notifications, eliminating manual enquiry handling time by 56%.

PROJECTS

- **Form Builder Platform**
  Code-free form generator using Next.js App Router and Server Actions with drag-and-drop capabilities via dnd-kit. Integrated Vercel PostgreSQL and Prisma ORM to track and visualize form submission analytics.
  – *Next.js, TypeScript, Prisma, PostgreSQL, dnd-kit, Tailwind CSS*
- **E-Commerce Grocery Store**
  Full-stack grocery platform with 5+ core modules including product catalog, cart, and checkout, Stripe-based payment processing, and cloud-based image storage.
  – *MERN, Stripe, Cloudinary, Axios, Bcrypt*
- **Cloud-Powered Chat Application**
  Real-time messaging system featuring user authentication, WebSocket communication, JWT-secured sessions, and REST APIs for user and session management across multiple chat rooms.
  – *Node.js, Express.js, Socket.io, JWT*
- **Conversational AI Platform**
  Web-based conversational interface utilizing the OpenAI API with prompt handling, AI-driven responses, and optimized media management supporting multiple image uploads per session.
  – *React, Node.js, OpenAI, ImageKit, Cloudinary*
- **Task Manager Application**
  Role-based task management system with JWT authentication, RBAC permissions across 3+ user roles, Redux-managed global state, responsive UI, and structured workflows for task assignment and tracking.
  – *MERN, Redux, JWT Authentication, Tailwind CSS, RBAC*

EDUCATION

University of Madras **Chennai, TN**
M.Sc. Computer Science *CGPA:* ***8.08*** *Sept 2022 – May 2024*

Edayathangudy G.S. Pillay Arts and Science College **Nagapattinam, TN**
B.Sc. Computer Science *CGPA:* ***8.58*** *July 2019 – May 2022*

CERTIFICATIONS

- **React – Complete Developer Course with Hands-On Projects**
- **Web Development Masterclass – Online Certification Course**
- **CSS, Bootstrap, JavaScript, and Python Stack Course**
- **Python and Flask Demonstrations Practice Course**
- **Python: Master Programming and Development with 15 Projects**
